Product Overview

High-quality PE twist ties, steel/PP binding wire and H65 brass copper tape for wire harness packing and cable bundling

JW-PM-BW1

Steel/PP Binding Wire

JW-PM-CT1

H65 Brass Copper Tape

JW-PM-GT1

PE Gang Twisted Wire Tie

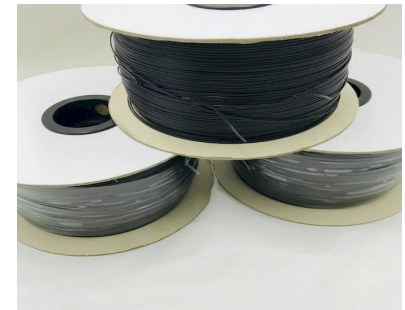

JW-PM-TT1

PE Twist Tie Wire (B/W)

JW-PM-AT1

Auto Twist Machine Ties (B/W)

JW-PM-PT1

PE Auto Wire Tying Twist Ties

Description

Premium binding wire specifically engineered for cable winding and tying machines. Constructed from a durable blend of steel and PP, offering the ideal balance of strength and pliability for automatic cable bundling applications including USB cables, power cables, HDMI cables and more.

Specifications

Parameter	Value
Material	Steel and PP (Polypropylene)
Type	Flat Wire (Round also available)
Wire Size	1.8mm width (customizable)
Color	Black, White (customizable)
Surface Treatment	Black
Length	1000m/roll
Weight	3kg/roll
Application	Cable Winding & Tying Machines
Compatible Cables	USB, Power, HDMI, Data Cables
Processing Service	Cutting (custom lengths available)
Delivery Time	Within 7 days

Key Features

- ◆ Durable steel/PP blend for secure, long-lasting cable ties with excellent flexibility

Description

High-purity H65 brass copper tape designed for wire splicing machines and crimp pressing machines. Provides reliable electrical connections for wire joints in wire harness manufacturing, ensuring excellent conductivity and secure crimping performance.

Specifications

Parameter	Value
Material	H65 Brass Copper
Type	Copper Tape / Belt / Strip
Primary Application	Wire Splicing Machine (Copper Tape Machine)
Secondary Application	Crimp Pressing Machine
Use	Wire Connection / Joint Splicing
Industry	Wire Harness Manufacturing

Key Features

- ◆ High-purity H65 brass material ensures superior electrical conductivity and stable connections
- ◆ Precision-manufactured tape with consistent width and thickness for reliable crimping
- ◆ Compatible with standard wire splicing machines and crimp pressing equipment

Description

PE gang twisted wire ties (also known as grape twist ties) in white and black colors. These connected-row plastic cable ties are widely used for plastic packing, garden tying (grape vines, plants), metal cable bundling and industrial cable harness manufacturing.

Specifications

Parameter	Value
Material	PE (Polyethylene)
Type	Gang Twisted Wire Tie (Connected-row)
Colors	White, Black
Applications	Plastic Packing, Garden Twist, Cable Ties
Usage	Industrial Cable Harness Manufacturing
Also Known As	Grape Twist Tie / Garden Tie

Key Features

- ◆ Gang/connected-row design for efficient continuous tying operations
- ◆ Durable PE material with good flexibility - easy to twist and secure
- ◆ Versatile for cable harness manufacturing, garden plant tying and general packaging

Description

PE twist tie wire in black and white colors for cable bundling applications. Available with or without galvanized iron core, in oval, round, single-sided, double-sided and flat shapes. Compliant with SONY and RoHS environmental standards. Suitable for binding headphone cables, power cords, AC/DC cables, data cables, toys and more.

Specifications

Parameter	Value
Material	PE (outer skin) / Galvanized Iron Wire (core)
Appearance Shape	Oval (also Round, Single/Double-sided, Flat)
Core Options	With core / No core (PET food-grade) available
Inner Core	Galvanized iron wire, 0.4-0.5mm typical
Outer Skin	PE / PVC
Oval Sizes	1.5mm / 1.7mm / 2.0mm / 2.2mm
Round Sizes	0.8-2.0mm (multiple sizes)
Color	Black, White (custom colors available)
Packing	1000m/roll, 10 rolls/case
Compliance	SONY, RoHS environmental standards
Applications	Headphone cables, power cords, data cables, toys, food bags

Key Features

- ◆ Compliant with SONY and RoHS environmental standards - safe for electronics and export

Description

Specially designed twist ties for automatic twisting machines used in industrial cable harness manufacturing. Available in standard white and black colors, with custom colors available on request. Engineered for smooth feeding and reliable twisting performance in automated production lines.

Specifications

Parameter	Value
Material	PE with galvanized iron wire core
Color Options	White, Black (standard)
Custom Colors	Available on request
Application	Automatic twisting / wire tying machines
Use Case	Industrial cable harness manufacturing
Design Feature	Optimized for smooth machine feeding

Key Features

- ◆ Specifically designed for automatic twisting machines - ensures smooth, jam-free operation
- ◆ Standard white/black colors with custom color options for branding or organizational needs
- ◆ Consistent quality for reliable automated cable bundling in high-volume production

Description

Premium PE twist ties for automatic wire tying machines with comprehensive custom options. Made of polyethylene PE material with high-quality galvanized iron wire core, offering excellent flexibility, acid/alkali resistance, corrosion resistance and oxidation resistance. Available in multiple shapes (flat, oval, round, double-sided, double-core), sizes and colors. Suitable for data cables, wires, garden tying, toys, crafts, food bags and daily use.

Specifications

Parameter	Value
Material	Polyethylene PE with galvanized iron wire core
Single-sided Sizes	2.5mm / 3.5mm / 4.0mm
Double-sided Sizes	2.2mm / 2.5mm / 3.0mm / 4.0mm
Oval Sizes	1.5mm / 1.7mm / 2.0mm / 2.2mm
Round Sizes	0.8mm - 4.6mm (8 sizes)
Double Core Sizes	3.0mm / 5.0mm / 8.0mm
Inner Core Diameter	0.4mm - 2.0mm (multiple sizes)
Standard Colors	Black, White, Transparent
Custom Colors	Red, Blue, Green, Yellow, Gray, etc.
Packing	1km/roll or 1km/shaft, free cut to length
Properties	Flexible, acid/alkali resistant, anti-rust, no wire exposure
Applications	Data cables, wires, garden, toys, food bags, daily use

Key Features

Comprehensive size options – 8+ shapes and 20+ diameter combinations for any automatic wire tying machine
